

INTEL TEACHING ESSENTIALS ONLINE TRAINING OF TRAINERS (TOT),

The Intel® Teaching Essentials Online Training of Trainers (TOT) prepares lecturers and teachers to be certified Intel Master Facilitators. This trainer preparation programme is part of the Intel Teach Programme which is a worldwide initiative to help classroom teachers learn how best to use technology to improve teaching and learning. This programme aims to prepare trainers to help participant teachers use the power of computer technology to spark student imagination and ultimately move them towards greater achievement through project-based learning.

Objectives:

The objectives of the programme are to:

- induct trainers to updated content of the programme
- conduct in-depth induction for trainers to the structure and teaching module of the Intel Teach Programme
- induct trainers to effective training strategies
- prepare trainers to meet technical and pedagogical challenges they may face during training
- prepare trainers to be skillful administrators on their training programmes
- consolidate participants' ability to develop and supervise projects

Content

The content of the course will be as follows:

- Induction and analysis of programme structure
- Course content update for Teaching Essentials Online
- Effective training and facilitation strategies
- Managing technical and pedagogical challenges during training
- Consolidation of programme basics - Hands-on project-based learning practice.

Duration

5 days (32 hours)

Modes of Delivery

Participants of this course will engage in discussions, buzz groups, project-based workshops, demonstrations, and presentations.

Participants

This course is intended for Participant Teachers preparing for Master Facilitator certification.
